

Mental Health and Psychosocial Support

# MINIMUM SERVICE PACKAGE

## WHAT IS THE MHPSS MSP?

The Mental Health and Psychosocial Support Minimum Service Package (MHPSS MSP) is an intersectoral package of 14 programme activities considered to be of the highest priority in meeting the MHPSS needs of emergency affected populations.

## WHY USE THE MHPSS MSP?

The MSP is designed to facilitate better coordinated, more predictable, and more equitable responses that make effective use of limited resources and thus improve the scale and quality of programming. This will ultimately result in substantially improved mental health and psychosocial well-being for larger numbers of people.

## HIGH-PRIORITY MHPSS ACTIVITIES

- MHPSS coordination and assessment;
- Essential components of all programmes (programme design, M&E, staff care, staff competencies);
- 14 programme activities;
- Activities for specific types of emergency settings (infectious diseases outbreaks; persons deprived of their liberty).

Each activity comes with checklists of core and additional actions.

## BASED ON EVIDENCE & EXPERT CONSENSUS

The package has been developed by the IASC MHPSS Reference Group with inputs from different sectors and Areas of Responsibility.

## INTERSECTORAL

MHPSS is a multisectoral and cross-cutting area of work with relevance across sectors.

## FOR ALL HUMANITARIAN ACTORS

Programme planners, coordinators, donors, implementing partners, technical advisors with diverse backgrounds and levels of experience.
